Well...
..... this is a mythical power .....
The story begins in the middle of a battle...
Then in Theocratic Calendar 0740, a certain group rebelled
They served "the Church" of "Kaiserhald", a city thought to be a Utopian society. Due to certain circumstances, their population decreased rapidly
Those who possess this power are known as "People of the Light"
...against the commander of the military division of the Church, Istvan and Nahatogaru, a prophet
They were once caught and tortured by the Church for their power. They had no means of freedom.
Until one teenager decided to face the cruelty ...
FAREL

T/N: In Chapter 0, I said Istvan's name was "Shitsu Kenkan" ...well that actually means "Commander" or "Sheriff". I wasn't sure about whether it was a name or not. Back then, while I was translating that, 'Nahatogaru' is the katakana reading of the other guy's name, but that doesn't mean it's his real name because everyone in the game seems to have an English counterpart. It's not on wikipedia Japan either, so feel free to correct me if you know I'm wrong. Really sorry. ><
